Dr. Dinesh Awasthi

Director Entrepreneurship Development Institute of India Ahmedabad

The Institute

An acknowledged National Resource Institute for Entrepreneurship Education, Research, Training & Institution Building.

Entrepreneurship Development Institute of India (EDI), an autonomous and not-for-profit institute, set up in 1983, is sponsored by apex financial institutions - the IDBI Bank Ltd., IFCI Ltd., ICICI Bank Ltd. and the State Bank of India (SBI). The Government of Gujarat pledged twenty-three acres of land on which stands the majestic and sprawling EDI campus. To pursue its mission, EDI has helped set up twelve state-level exclusive entrepreneurship development centres and institutes.

EDI conducts a variety of programmes around thrust areas such as; Entrepreneurship Education & Research, Micro Enterprises, Micro Finance and Sustainable Livelihood; SMEs & Business Development Services; Social Entrepreneurship; Cluster Development and Women Entrepreneurship. In order to promote and advance entrepreneurship research, EDI established a Centre for Research in Entrepreneurship Education and Development (CREED).

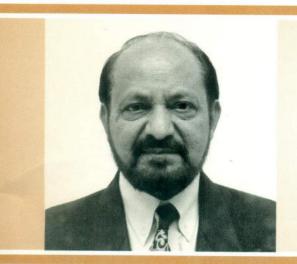

On account of EDI's achievements, it has been, beckoned by various Ministries of the Government of India to take up need based projects. EDI has been appointed nodal agency for the Ministry of Food Processing Industries, Ministry of Textiles, Department of Science & Technology, Ministry of Urban Poverty Alleviation, Ministry of External Affairs, Government of India to carry out holistic entrepreneurship development initiatives in the respective domain.

In the international arena, efforts to develop entrepreneurship by way of sharing resources and organising training programmes, have helped EDI earn accolades and support from the World Bank, Commonwealth Secretariat, UNIDO, ILO, FNSt, British Council, Ford Foundation, European Union, ASEAN Secretariat and several other renowned agencies.

The Ministry of External Affairs, Govt. of India has recently assigned EDI the task of setting up Entrepreneurship Development Centers in Uzbekistan and five African countries.

In recognition of its international achievements, the United Nations Economic & Social Commission for Asia and Pacific (UN-ESCAP), Bangkok, Thailand, has declared EDI as a 'Center of Excellence'.

Planning for the Year 2014-15

"Over these years EDI has taken up challenging tasks, devised successful innovative models, most of which have become replicable. I am sure the forthcoming year will also be a landmark year in terms of the Institute generating results for teeming millions looking for entrepreneurial opportunities and options.

Education will continue to embed a unique winning streak in the 'pillars of the nation.' The full time, two-year PG courses in Business Entrepreneurship and in Development Studies would be complemented with more certificate and diploma courses in entrepreneurship and related subjects. Rehabilitating school dropouts and adolescent boys and girls of Madhya Pradesh will be one of the major activities to make the isolated populace in society an embodiment of confidence and courage to initiate micro enterprises. With several new programmes instituted for the teaching group this year, the vision of creating widespread entrepreneurial environ will certainly not be far away.

Recently. PGDM-BE programme also received Accreditations from the National Board of Accreditation (NBA) and The Association of Indian University, thus according it the equivalence of an MBA programme by an Indian University. The international USASBE recognition adds one more feather to our cap. But all this brings in added responsibilities too and we are geared to launch our Business Entrepreneurship course as a one-year full time programme for international students.

Also rural and micro enterprise related programmes would promote income generating initiatives with due focus on revitalizing clusters. Technology based entrepreneurship development programmes, agri entrepreneurship

programmes and special programmes for disadvantaged groups would be big leaps towards developing dynamic entities. As Cluster Management and Technical Agency (CMTA) for Mega Handloom Cluster Project at Sivasagar and Srinagar, EDI would continue to run integrated programme, thus leading the clusters on a fast growth trajectory. Considering that most problems of rural areas bear a striking resemblance to those of the urban locales, urban poverty alleviation would also be targeted.

Further setting up entrepreneurship development centers at Uzbekistan and in five African countries would be another major developmental task. We are confident that our result oriented strategy and module will create an insignia of entrepreneurial feats and success. The Institute would also target difficult terrains, like the Meghalaya to develop a cadre of well groomed, skilled and trained entrepreneurs who would not just be economically stable but also serve as a panacea for the region's growing unemployment problem.

While we would continue to create competitive entrepreneurs and intrapreneurs, nationally and internationally, we also wouldn't stop transforming society through social entrepreneurs. Hence, the 'Centre for Social Entrepreneurship' at the Institute will implement innovative programmes to create par excellence developmental strategies through a cadre of dynamic social entrepreneurs.

We plan to address varied issues in the forthcoming year. We are sure we will succeed in converting challenging situations into promising opportunities."

> - Dinesh Awasthi Director

Awards & Recognitions

. Dr. Dinesh Awasthi presented with the Most Talented Global Training & **Development Leaders Award**

Dr. Dinesh Awasthi, Director, EDI has been awarded the Most Talented Global Training & Development Leaders Award at the 22nd edition of the World HRD Congress in Mumbai on 15th February 2014. The decision was taken as against the parameters of Strategic Perspective, Track Record, Ability for Sustainability, Future Orientation, Integrity & Ethics and Competencies.

many state and national level research projects. Current interests include; MIS, Database Management, IT Infrastructure Management, Data Mining, e-CRM, Programming, Quantitative Techniques, Research Methods and Data Analysis.

Centre for Entrepreneurship **Education & Research**

And the award winners exult...

Vision

- To act as a Key Resource Centre for policy-level interventions, curriculum design, resource material and human resource development in entrepreneurship education at national and international levels.
- To undertake and support research in entrepreneurship and disseminate findings through seminars, workshops and publications of repute.

Holding on to the conviction that entrepreneurship education is an apt medium to reach out to a wider section of society thereby creating 'job providers' instead of 'job seekers', EDI has helped develop a positive approach towards self-employment. If the recent times have recorded a high incidence of entrepreneurial success, it can safely be attributed to Entrepreneurship Education which has started gaining significance and has become well accepted by individuals, society and institutions alike. EDI has been quick to embrace new ideas and sow the seeds of change through a host of activities for students and the faculty group.

National summer camps and awareness-cum-skill building programmes have gone all out to create a new breed of children and youth with winning attributes & entrepreneurial qualities. Branching out with the motive of 'catching them young', the Institute, in the coming year, will expand to include, 'regional level school specific summer camps', 'vocational education, guidance and career counseling and skill development programmes,' to impart high achievement motivation to children and youth and teach them to develop knowledge and skills to make a life in entrepreneurship. Tribal youths of Betul, Madhya Pradesh, besides several disadvantaged sections, such as school drop outs would be particularly focused upon. A step further in the direction of making entrepreneurship as natural as any other discipline in education, EDI's Post Graduate Programme in Management – Business Entrepreneurship is playing a firm role and fast churning out tangible results.

The programme, 'Post Graduate Diploma in Management -Development Studies' endorses that business entrepreneurship has to go hand-in-hand with social entrepreneurship for balanced socio-economic development.

The Open Learning Diploma in Entrepreneurship and collaborations with universities within and outside India are also giving ample exposure to young potential entrepreneurs and evoking in them a stronger confidence to make it big. The coming year will touch upon varied critical aspects of entrepreneurship through many new programmes, certificate courses, seminars and workshops.

Together the programmes and initiatives under this thrust will ensure policy formulation, contemporary entrepreneurship curriculum design, wide dissemination of knowledge, better learning and a rising incidence of self employment for a productive tomorrow.

Programmes and Activities 2014-15

Centre for Micro Enterprises, Micro Finance and Sustainable Livelihood

Seen during the signing of MoU between EDI and Kerala State Youth Welfare Board (KSYWB) are (2nd from R) Ms. P K Jayalakshmi, Hon'ble Minister for Youth Welfare, Government of Kerala and (2nd from L) Dr. Dinesh Awasthi, Director, EDI

Vision

To become an acknowledged resource, action-research and policy advocacy centre for institutions promoting microenterprises, micro-finance and business development services with focus on Governance of NGOs / Non-Profit Organisations both within the country and among developing economies.

The Micro Enterprise, Micro Finance and Sustainable Livelihood Centre focuses on evening out the conditions of the lesser privileged. The initiatives promote growth underlined with equity; mobilize savings and financial resources for productive enterprise activities; advocate advanced techniques of business and cluster based approach of success. The efforts have led to significant poverty alleviation and employment generation both in urban and rural areas throughout the country.

EDI regularly conducts capacity building programmes for various target groups to enhance the impact and spread of its initiatives. In order to meet local needs and foster sustainable and self sufficient communities, the coming year will witness skill development programmes to improve skills of unemployed youths in a specific trade, also with focus on youths from minority communities, to improve their employability. NGOs and a conducive support system environ have given fillip to the Rural Entrepreneurship Development Movement and emerged as forceful players in social change. EDI ensures their effectiveness by mounting several capacity building programmes that help them address issues more convincingly.

EDI's Cluster-based approaches for various artisanal and industrial clusters, especially in areas that have been girdled with dilemmas and crises since ages, have come to be recognized as breakthrough novel strategies.

Urban areas burgeon with infinite opportunities and have a history of entrepreneurship emerging from various possibilities. EDI with support of Ministry of Housing & Urban Poverty Alleviation, Govt. of India has launched a project to motivate and train people to take up entrepreneurial roles.

The Centre aims to probe deeper into the area so as to render growth and stability to the deprived and the needy. In line with these interventions, it also plans to undertake Action Research on 'Sustaining Community Livelihood through Farming of Anantmula - A Herbal Creeper' and 'Market Development Study for Select Handloom Cluster in Assam'.

The Institute will continue with a gamut of activities under this Centre to evolve a broad based and futuristic world characterized by sustainable growth and competitiveness.

Participants of the 'Master Trainers' Training Programme in Entrepreneurship for Directors and Faculty Members of RUDSETI/RSETI'

Centre for SMEs & Business Development Services

Valedictory function Chief Guest, Shri Maheshwar Sahu, IAS, Former ACS, Industries and Mines Department, Govt. of Gujarat, presenting certificate to a participant of an international programme

Vision

- To create world class entrepreneurs and facilitate growth of small business entrepreneurs and enterprises into medium and large.
- To create an environment conducive to entrepreneurship by knitting together all relevant players viz., support system institutions, governments and potential / existing entrepreneurs.
- To become an International Resource Centre to institutionalize Entrepreneurship Development and Investment Promotion activities in developing/developed countries.

SMEs can certainly make a mark if entrepreneurs and employees are nurtured, trained and counseled effectively. For creating 'World Class' entrepreneurs, EDI has been conducting training programmes and undertaking research for existing and potential entrepreneurs, ensuring that they have a sustainable potential base to grow.

The Indian Food Processing industry is an area with immense scope and potential that could be harnessed to benefit the umpteen people of India who dream of becoming an entrepreneur. EDI worked out an implementation model to kick start enterprises in the Food Processing area in 22 states. EDI's contribution towards promoting Science and Technology based enterprises has also been greatly recognised. Widening the base of such innovation driven enterprises, EDI is also assisting the Department of Science and Technology to promote S & T entrepreneurs by imparting training to them. Project like; i-STED in Assam would bring about conspicuous socio-economic

development in the region by connecting S&T interventions with entrepreneurial opportunities.

The entrepreneurs of Gujarat will specifically benefit with the implementation of new programmes on Patenting, Intellectual Property Rights, Climate Change Adaptation, International Trade and Technology Harnessing.

Country/theme specific Ministry of External Affairs programmes have also made a mark and become popular for their highly technical inputs in a number of areas surrounding the theme of entrepreneurship. The project to set up Centres at Uzbekistan and five select African Countries will impart a stronger entrepreneurial routing to the world.

Incorporating sophisticated technology & management principles have been the thrust of EDI initiatives under the banner of this Centre, thus promoting innovation in entrepreneurship development.

3.9.3	New Enterprise Creation :				
3.9.3 (a)	Launching of the First New Enterprise Creation (NEC) Programme	Uzbekistan & Rwanda	3 Phases stretched over 6 months	Potential Entrepreneurs	A group of 25 indigenous entrepreneurs will be developed to take up small business ventures in the country.

International Centre for Cluster Competitiveness, Growth & Technology (IC³GT)

(2rd from R) Mr. H D Shrimali, Addl. Industries Commissioner, Govt. of Gujarat supervising the electro polishing process invented by EDI at a cluster unit in Ahmedabad

Vision

To foster global competitiveness & growth of MSMEs in clusters through a range of technical, managerial, capacity building, handholding and advisory services.

Clusters in India, with their 'over' reliance on traditional practices and knowledge have build their own miniscule business world where understanding the growing vicissitudes of business is not considered significant. In yet other cases, there is awareness and thus the desire to develop a responsiveness to change, but the operational deficiencies are alarming, thus restricting growth. EDI's Cluster Development Model helps cluster entrepreneurs cope with both the situations. The Model has demonstrated that if entrepreneurs facing common challenges as also opportunities are addressed in a conglomeration, the advantages increase for all. Efficiency of all the firms in a given cluster is improved as their competencies and outlook become contemporary and progressive.

EDI has introduced result-oriented activities based on research on emerging cluster revivification principles and replicable models. Based on the revelations of the diagnostic study which it undertakes before venturing on a project, it develops a multi pronged approach to control input and manufacturing cost, introduce energy efficiency methods, lean manufacturing practices, cleaner production technology, develop markets and establish buyer-seller linkages.

Some of the pilot initiatives of the Institute were: the Jamnagar Brassparts Cluster; Rajkot Engineering Cluster and the Autoparts Clusters at Jalandhar, Ludhiana and Phagwara into cohesive, self reliant and competitive entities. Close on the heels is the success of 12 MSME clusters, 23 Handloom

Clusters, 5 Village Industry Clusters, 7 Khadi Clusters and 7 Coir Clusters. The project 'Implementing BDS in MSME Cluster in Dyes and Chemicals (Ahmedabad) and in the Leather cluster (Calcutta & Chennai)' with the support of SIDBI has yielded conspicuous results. Baroda Engineering Cluster, and the Textile Machinery Cluster, Ahmedabad, Surat and Surendranagar also bear a changed countenance today.

The Centre is presently assigning stability to Handloom Cluster, Sivasagar (Assam), Handicraft Carpet Cluster, Srinagar; Gold Ornaments Cluster, Rajkot; Engineering and Dairy Manufacturing Cluster, Anand; Pharma Machinery Cluster, Ahmedabad; Foundry & Forging Cluster, Vadodara; Tribal Garments Cluster, Khonglong, Manipur; Furniture Cluster, Ranchi and Cottage and Rural Industry Clusters of Gujarat.

Several capacity building programmes for grooming Cluster Development Executives and training functionaries of Business Management Organizations have been conducted and will be taken up in the coming year. The Centre also conducts international capacity building programmes for Business Membership Organizations and for honing skills of cluster development executives in Asia, East Europe, Central Asia, Africa and Latin America.

The Centre aims to improve global competitiveness of clusters through a range of strategic interventions which in turn would have a positive impact on the livelihood conditions of artisans.

Programmes and Activities 2014-15

Sr. No.	Activity	Location	Duration	Target Group	Objectives & Outcome

Participants of the 'Cluster Development Executives (CDEs) Programme' seen with (7th from R) Dr. Dinesh Awasthi, Director-EDI; (on his left) Dr. Sanjay Pal, Programme Director and faculty members associated with the programme

Centre for Social Entrepreneurship & Corporate Social Responsibility

Dignitaries at the inauguration of the International Workshop on 'You Business Leaders Programme'

Vision

To create a cadre of social entrepreneurs who initiate a large number of sustainable social enterprises that help in empowering the marginalized sections of the society.

Combining business sense with a social cause to make a difference to society has dawned upon some good Samaritans who are making a world of difference to the lives of the underprivileged. This is a new breed of professionals who have discovered that their strengths and competencies can be used for creating businesses involving the poor and benefiting them economically and socially. They are hailed as Social Entrepreneurs....the people who identified or recognized a social problem and used entrepreneurial principals to organize, create, and manage a venture to achieve the desired social change.

Programmes proposed by this Centre spearhead social entrepreneurship, thus creating social entrepreneurs who recognize the inherent disadvantages rooted in the society and come out with market driven innovative solutions to address the problem. The 6-month Distance Education Programme in Social Entrepreneurship imparts knowledge, education and skills to those who wish to set up own social enterprises. Another innovative programme offered is the, 'Social Enterprise Development Programme' which in 8 weeks, through class room sessions and practical training readies potential entrepreneurs with all skills to float their social enterprises. It has been seen that some social entrepreneurs set up their enterprises but are unable to pull

along after the initial three to four years. Sustainability becomes an issue. Addressing their concerns, EDI has initiated a unique 'Growth Programme for Existing Social Entrepreneurs' to develop entrepreneurial and managerial competencies in them so that they easily scale their operation and carve new successes.

EDI would also assist / partner in CSR projects, ensuring sustainability of initiatives. EDI would particularly broadbase social entrepreneurship in Kerala by imparting training to the employees of the corporate sector. In a major developmental move, EDI would increase the employability of the youth of Bhubaneswar by training them under 'Vocational Guidance and Skill Development of Youths' in some pre identified skills. This will generate jobs for them.

At the global level also, EDI sensitizes and develops a cadre of social entrepreneurs, trainer-motivators, counsellors and policy makers to understand the finer nuances of social entrepreneurship through its 'International Programme on Social Entrepreneurship'.

The Centre has launched contemporary and need-of-thehour programmes and the coming years will continue the trend.

Programmes and Activities 2014-15

Sr. No.	Activity	Location	Duration	Target Group	Objectives & Outcome	
5.1	Centre for Social Entrepreneurship

Participants of the programme - 'Addressing Bottom of the Pyramid through Fostering Social Entrepreneurship/ Social Business' during their study tour

Centre for Women Entrepreneurship & Gender Studies

Participants of the programme, 'Entrepreneurship Development & Management for Women Scientists and Technologists

Vision

To act as a repository of knowledge in the area of women entrepreneurship development and carry out activities to break the barriers that inhibit women from emerging as successful entrepreneurs.

As compared to their male counterparts, not many women have written entrepreneurial success stories. While their perspectives and aspirations are perfectly in place, they are unable to bring their entrepreneurial potential into full play on account of certain distinct socio-economic hindering factors. However, what is encouraging is that the government, and also many organizations, have stepped forth, urging women to grow and strive for entrepreneurial success. Gender mainstreaming is the need of the day and can be achieved with a focused and integrated approach towards women entrepreneurship development. EDI offers effective market driven business development services to potential women entrepreneurs to bring about a shift in their attitude, motivation, knowledge and working style. Business development service providers working in the field of promoting women entrepreneurship are also oriented to implement gender-sensitive systems and strategies to trigger woman empowerment and equality

Beginning with Girls' Education Programmes in Life Skills, in the coming year, the activities will move on to encompass an integrated and focused approach towards women entrepreneurship development with the intent of empowering women to set up and manage their own business. The Girls' Education Programmes in Betul, Madhya Pradesh is already helping girl children of the region acquire knowledge, skills and attitude for surging ahead in life with confidence. Further, in order to raise the incidence of women entrepreneurship, women entrepreneurship development programmes will be organized at regional levels as well. In order to promote knowledge based industries the centre has planned a series of orientation programmes for women with technical education and also for scientists and technologists with the Government sector. The plight of women in rural locales rather inhibits them from coming forward. Thus, in order to give them access to better living conditions and improve their circumstances, the Centre has planned to embark on education and development programmes for women Self Help Groups.

As a step towards making women independent with working knowledge on various aspects concerning business, the Centre has planned programmes on 'Financial Management', 'Marketing Management' and 'Performance Improvement' for women entrepreneurs. In addition, the 'Management Development Programmes for Women Executives' would be a pathway to women gaining a voice in the so called male dominated domains.

Towards creating a learning resource in the area, the coming year will see documentation of select Case Studies of Successful Women Entrepreneurs.

The Centre for Women Entrepreneurship and Gender Studies, therefore, functions to encourage potential and existing women entrepreneurs to come forward, learn, establish/ diversify their ventures and become self-sufficient. Through myriad activities, the coming year will witness a yet more conspicuous mindset change in their approach and attitude.

Programmes and Activities 2014-15
