Entrepreneurs to get training in use of solar power

TIMES NEWS NETWORK

Ahmedabad: Entrepreneurship Development Institute of India (EDI) will train 1,000 social entrepreneurs in solar energy sector in Gujarat.

The entrepreneurs will be trained to manufacture solar gadgets and install solar equipment or panels. These entrepreneurs will also be facilitated by extending venture capital funds for setting up their businesses.

EDI has signed a pact with Aspire Disruptive Skill Foundation and Shree Jagannath Cultural Academy Research Centre (JCARC).

EDI director Sunil Shukla said: "We will provide entrepreneurial inputs and concentrate on developing social entrepreneurs who can establish their ventures in manufacturing gadgets and devices in solar energy sector and extend services at domestic and industrial level."

Aspire will depute technical experts to provide training on setting up solar energy plants and business. It will also set up an incubation centre in solar energy domain. JCARC will provide basic infrastructure, classrooms, labs, auditorium and hostel facilities.
