**Ahmedabad:** Realising the need for students to understand the present start-up policies by various state government's, the Entrepreneurship Development Institute of India (EDII) has decided to introduce 'Start-up India Policy' in its curriculum.

Not just the start-up policy, the institute has also introduced 'Understanding of Family Business' as a core subject along with a special

### EDII extends seed funding to 6 students

EDII extended seed funding of Rs 9 lakh to six students for developing their start-up ideas. To promote student start-ups, from this year onwards, EDII is promoting 'Launchpad' where student can work on their start-up ideas after classroom hours. 'Launchpad' will function more or less like an incubator for start-ups.

subject on 'Indian Economy: government Policy and SME's' in its curriculum.

"Government of India and various state governments like Government of Gujarat, Kerala and Haryana are coming up with

their start-up policies to promote start-ups. In such scenario, students need to learn about various aspects of government's start-up policies in detail, said Dr Satyaranjan Acharya, associate senior faculty at EDII.
