Entrepreneurship Development Institute

NIKITA DATTANI
PRODUCT: NanoAir Scarf
FUNDS RAISED: **Rs 90,000/-**

SHE might be in second year of Post Graduate Diploma in Business Entrepreneurship but trust her to address one of the most serious problems we face. Nikita has founded MyssTre and has developed a scarf with nanofibres that act as filter against pollution. "I was part of a lecture about nanofibers and could not understand a thing. So, I asked the professor to explain everything again and eventually came up with the idea," she said. Good thing about her is she is a student of entrepreneurship and so her venture is also her laboratory. "I just have three hours of classes each day and the studying happens just around exams. So, I have more time for MyssTre," she said.
